

Initial Fill Regions

```
graph TD; A[Initial Fill Regions] --> B[Density Planning]; B --> C[Candidate Fill Generation]; C --> D[Density Planning]; D --> E[Dummy Fill Insertion]; E --> F([Output Fills]);
```

The flowchart illustrates a sequential process for fill planning. It begins with 'Initial Fill Regions', which leads to 'Density Planning'. This is followed by 'Candidate Fill Generation', then another 'Density Planning' step, then 'Dummy Fill Insertion', and finally 'Output Fills'.

Density Planning

Candidate Fill Generation
